Discharge Summary

Name: Devan Hibbs

MRN: 30077763

Age: 19 year old

DOB: 10/28/1990

Admit date: 6/7/2010

Discharge date: 6/11/2010

Attending Physician: Bowen,J. Richard, MD

Admission Diagnosis: idiopathic scoliosis

Discharge Diagnoses: Status post PSF T5-L2

Procedures: PSF T5-L2

Consults: PT

Devan is a 19 year old female referred to Dr. Bowen,J. Richard, MD who was diagnosed with idiopathic scoliosis. After review of the appropriate laboratory and radiographic studies it was recommended that she undergo PSF on 6/7/2010. Patient and family elected to undergo the recommended procedure and gave informed consent after a thorough discussion of the risks and benefits. Patient tolerated the procedure well. The patient had no perioperative complications.

Devan was seen and evaluated by the Attending and Physical Therapy and progressed to the point that it was felt that the patient was safe for discharge and that patient and family teaching was completed. The patient was also tolerating her preoperative diet and voiding as usual.

The patient was discharged home in stable condition on post-operative day 4. The patient will follow up with Dr. Bowen,J. Richard, MD in 7day(s). The patient and her family were advised to call the office if a fever greater than 101 degrees develops, if there's any drainage or redness of the incision(s) or for any other concerns.

Patient Instructions:

Diet: Resume preoperative diet

Activity: excuse from school and gym until further notice

Weight Bearing Status: weight bearing as tolerated bilateral lower extremity..

Equipment: walker as needed
